**Attachments:** September 6 2017 Agenda USDA IHS HUC EPA.docx

Hi Audrey,

I looked at the RTOC agenda and I don't think the HAMP is going to come up at the next RTOC meeting. I left you a voicemail with more details so feel free to call me to discuss

I have briefed Tomás about the project a few months ago and I can offer the following update below. Also I've attached a still DRAFT agenda for our meeting in September. I still need to get USDA's input but then we can share with ENF. It is shaping up to have some higher-level attendees that I had originally anticipated which is great. Lionel as well as a Water and Energy Team (WET) member from the Hopi Tribal Council and the president of the HUC board plan to attend. I'm working with Eric M. to see if we can also get the USDA state director, Ernie Weatherbee to attend for the morning session as well. I wanted to share this with you and David, since it may be good to have a higher level EPA person at least on the phone for the morning session.

*The Hopi Arsenic Mitigation Project (HAMP) is a proposed rural water system, that would provide arsenic-compliant drinking water to four Hopi Village Water Systems: First Mesa Consolidated Villages, Sipaulovi, Mishongnovi and Shungopavi, that are currently out of compliance with EPA's arsenic standard of 10 parts per billion. On September 6, 2017 representatives from the EPA water division, the Indian Health Service (IHS), the Hopi Utility Corporation, and the Hopi Tribal Council Water and Energy Team will meet with the USDA-RD in Phoenix to discuss the HUC's proposed application to the USDA for funding the construction of the rural water system. Potential funding contributors also include EPA, IHS and the Hopi Tribe.*

Lastly, we have not provided the Hualapai with any DWTSA funding in the last two years. Was the press office interested in the Yavapai project? I hadn't heard back on that.

Thanks

Emmanuelle

Hi Emmanuelle,

Happy Friday! Karly mentioned to me that you thought an update regarding the HAMP would be good to insert into Tomás' briefing packet. Do you have a one page briefing paper on the project that you can send to me? Danielle needs any one-pagers by Monday morning.

Also, have we given any funding to Hualapai for DW projects in the last 2 years? If so, how much and what for?

Let me know if you have any questions,
